

# Watcher (WR)

The Watcher monitors autonomously for customer any analyzer

## Apply to Any - All Sample Analyser

### AIMDF The Future for Medical Device Monitoring.

#### Medical Device Map

#### ISO 13485 Medical Device

##### Customer service

Increasing quality of service by doing faster response, real time analysis, archive analysis and having a bigger MTBF

##### Artificial Intelligence (AI)

Artificial Intelligence (AI) adapter to improve the analyze and watcher function.

##### Functions

Different functions are monitored like performances functions, Maintenance functions, hardware functions, Service function, Consumption function and run function.

##### Type of report

Different type of report. Functional report, Maintenance report, Error report, Status report, Service report, Localisation report, Hardware report, Power on report and more.

##### Regulatory/QA

Real time and Archives to help regulatory and QA investigation .

##### Archiving

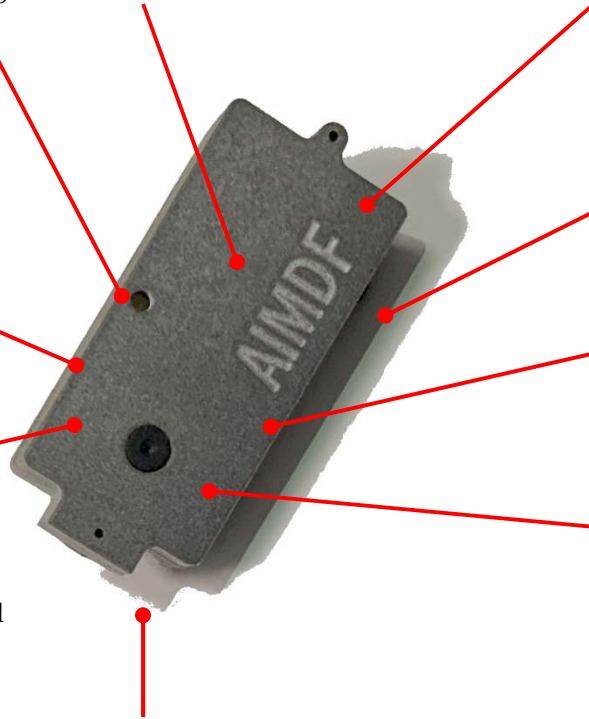

Capable of Archiving Pictures and Video for Service, Case study, Statistics, troubleshooting, improvement, Regulatory issue, and more.

##### Real Time

Real time video for remote service.

##### Internet of Things (IoT)

The internet of Things (IoT) provide many tools to improve **communication**, reporting, monitoring and more functionality.

## Distributor Advantages

### General Monitoring = Cost Reduction

Service Cost Reduction

Better Maintenance

Better Performance Monitoring

Reagent Monitoring = Product Improvement

Regulatory Affair Monitoring

Remote Service = Less travelling

QA Improvement

Real Time video = Better & Faster service

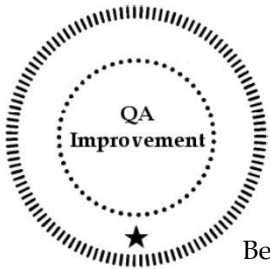

### Better monitoring = Cost Reduction

## Advantageous Pricing

ECO-Green
